Information overload

- Masalah:
 - 4 Billion URL yang di-indeks oleh Google
 - 200 TB data dalam Web [Lyman & Varian, 2003]
- Pendekatan yang mungkin:
 - information retrieval
 - document clustering
 - information extraction
 - question answering
 - text summarization

Contoh artikel

MILAN, Italy, April 18. A small airplane crashed into a government building in heart of Milan, setting the top floors on fire, Italian police reported. There were no immediate reports on casualties as rescue workers attempted to clear the area in the city's financial district. Few details of the crash were available, but news reports about it immediately set off fears that it might be a terrorist act akin to the Sept. 11 attacks in the United States. Those fears sent U.S. stocks tumbling to session lows in late morning trading.

Witnesses reported hearing a loud explosion from the 30-story office building, which houses the administrative offices of the local Lombardy region and sits next to the city's central train station. Italian state television said the crash put a hole in the 25th floor of the Pirelli building. News reports said smoke poured from the opening. Police and ambulances rushed to the building in downtown Milan. No further details were immediately available.

When, where? Says who?

Kata penting

What happened?

MILAN, Italy, April 18. A small airplane crashed into a government building in heart of Milan, setting the top floors on fire. Italian police reported. There were no immediate reports on casualties as rescue workers attempted to clear the area in the city's financial district. Few details of the crash were available, but news reports set off fears that it might be a terrorist act akin to the United States. Those fears sent U.S. stocks tumbling to session lows in

How many victims?

Was it a terrorist act?

Witnesses reported hearing a loud explosion from the 30-story office building, which houses the administrative offices of the local Lombardy region and sits next to the city's central train station. Italian state television said the crash put a hole in the 25th floor of the Pirelli building. News reports said smoke poured from the opening. Police and ambulances rushed to the building in downtown Milan. No further details were immediately available.

What was the target?

Jenis Ringkasan

- Tujuan
 - Indicative, informative, critical summaries
- Bentuk
 - Ekstrak (paragraf/kalimat/frase)
 - Abstrak: suatu ringkasan yg padat dari topik permasalahan dari suatu dokumen [Paice90].
- Dimensi
 - Single-document vs. multi-document
- Konteks
 - Query-specific vs. query-independent

Julio Adisantoso, ILKOM-IPB 8

Jenis Ringkasan

- Indikatif vs. informatif digunakan untuk kategorisasi secara cepat vs. pemrosesan isi.
- Ekstrak vs. abstrak daftar fragmen teks vs. menyimpulkan kembali isi secara koheren.
- Query-independen vs. query-spesifik mengikuti pandangan penulis vs merefleksikan minat dari user
- Background vs. just-the-news asumsikan jika pengetahuan pembaca sebelumnya tidak banyak vs. sangat mengikuti perkembangan.
- Single-dokumen vs. multi-dokumen berdasarkan pada satu teks vs. penggabungan beberapa teks.

Julio Adisantoso, ILKOM-IPB 9

Hasil Ringkasan

- headlines
- outlines
- minutes (notulen)
- biographies
- sound bites
- movie summaries
- chronologies, etc.

Julio Adisantoso, ILKOM-IPB 10

Ekstrak vs Abstrak

- Ringkasan Teks

Proses penyaringan informasi yang paling penting dari suatu sumber (atau beberapa sumber) untuk menghasilkan suatu versi yang ringkas untuk user.
- Extract vs. Abstrak
 - Suatu extract adalah ringkasan yang isi seluruhnya disalin dari input.
 - Suatu abstrak adalah ringkasan yang paling sedikit ada isinya yang tidak ada pada input, mis. kategorisasi topik, menyarikan kembali isi, dsb.

Julio Adisantoso, ILKOM-IPB 11

Pendekatan Tradisional

- Human summarization and abstracting
- Professional abstractors

Julio Adisantoso, ILKOM-IPB 12

Pendekatan Statistika

- Linear Feature Combination untuk melakukan ekstraksi kalimat.

$$Weight(U) = \alpha \cdot Loc(U) + \beta \cdot Phrase(U) + \gamma \cdot Thema(U) + \delta \cdot Term(U)$$

Julio Adisantoso, ILKOM-IPB

13

Linear Feature Combination

- Location : bobot diberikan pada suatu unit teks berdasarkan posisi munculnya di awal, tengah, atau akhir paragraf atau seluruh dokumen, atau pada bagian tertentu dari dokumen seperti pada bab pengenalan atau kesimpulan. (mis, judul, introduksi, kesimpulan).
- Phrase: bobot diberikan pada suatu unit teks bila fixedphrases muncul, misal : (singkatnya, penyelidikan kami menunjukkan, tujuan artikel ini adalah, ...), kata penekanan (penting, terutama, ...)
- Thema : bobot diberikan pada suatu unit teks karena adanya kata yang penting secara statistik (mis. Kata tf.idf) pada unit tersebut sesuai dengan dokumennya
- Term : bobot diberikan pada suatu unit teks untuk kata-katanya yang juga muncul di judul, berita utama, paragraf awal, atau query dari user.

14

Contoh Sederhana

Ancaman krisis pangan sudah di depan mata dan bakal dirasakan rakyat bila pemerintah tidak segera turun tangan untuk memperbaiki sektor pertanian yang juga mengalami krisis. Tanda akan krisis pangan sudah tampak dan diungkapkan Jafar Hasnah dalam acara sosialisasi program perluasan areal tanam tahun 2004 di Balikpapan. Salah satu ancaman bagi stabilitas pangan nasional, antara lain, adalah semakin menyempitnya lahan pertanian akibat alih fungsi untuk perumahan dan tempat usaha lain, seperti pabrik dan pergudangan. Selain itu, irigasi pertanian di berbagai daerah semakin tidak mendapat perhatian dalam hal perawatan sehingga di sana-sini retak, bocor, dan tidak lagi efektif untuk mengalirkan air ke petak-petak areal pertanian.

ancaman	krisis	pangan	pertanian	stabilitas
20	25	15	100	10
alih fungsi	perumahan	pabrik	gudang	
10	15	5	5	

Tabel menunjukkan banyaknya dokumen yang mengandung kata. Misalkan N = 1000 dokumen. Ringkas menjadi 2 kalimat dengan pembobotan TF.IDF.
