

Samba

Install Paket Samba :

```
#sudo apt-get install samba
```

Kemudian Ketikkan :

```
#sudo smbpasswd -a USERNAME (username yang aktif)
```

Membuat folder file yang akan di Share :

```
#mkdir /home/USERNAME/Share
```

Permission Untuk Folder :

```
#chmod 777 /home/USERNAME/Share
```

Edit file smb.conf

```
#nano /etc/samba/smbd.conf
```

Masukkan :

```
[Share]  
path = /home/USERNAME/Share  
available = yes  
valid users =USERNAME  
read only = no  
browseable = yes  
public = yes  
writeable = yes
```

Restart Service samba :

```
#/etc/init.d/samba restart
```

Ketikkan :

```
#testparm
```
